These conditions are determined by the surgeon during surgery. There is a mandatory charge of \$30 (includes \$28 set up fee) for fluids given to cats who are in heat or pregnant. **** These special circumstances cannot be discerned until after surgery has started. If any of these are found, the ovariohysterectomy (spay) will continue without notification to the owner.****

Initial _____

Flea Infestation:

If your pet has a flea infestation upon arriving for their procedure they WILL be given a Capstar tablet that will eliminate all fleas and eggs within 30 minutes. Small - \$10 / Large \$12

Initial _____

Recommended:

These items are highly recommended, NOT required. Please initial next to the items you want to include. Please ask the receptionist if you have any questions.

PLEASE FILL OUT COMPLETELY.

- **Pre-Anesthetic Profile** ___ \$103 (Chem10/Lyte4/CBC) OR ___ \$113(Chem17/Lyte4/CBC)
Blood tests are taken before anesthesia to evaluate any problem existing within the body and also to help select the best anesthesia for us to use. Blood tests help minimize the risks of the anesthesia. Chemistries, complete blood count, and electrolytes are included in both panels.
- **Subcutaneous Fluids or IV Fluids** ___\$30 (includes setup fee normally \$28). Helps maintain blood pressure during surgery, also replaces fluids that you pet has lost while fasting and during anesthesia.
- **IV Catherterization**___\$28 Catheter placement is vital should life-saving medications need to be give or should a problem occur during or while recovering from anesthesia.
- **Blood Pressure** ___ \$25 Monitoring blood pressure is especially important in pets that are under anesthesia, sub clinically ill, or have heart problems. A drop in blood pressure can indicate shock or internal bleeding. This can also be useful for monitoring anesthetic depths.
- **Microchip (Home Again)**___ \$39 (\$18.99 to register) Complete nationwide system for recovering lost or stolen pets. Recommended to do while pet is under anesthesia. There is an additional registration charge by the microchip company.
- **FLBT/FIV/HW** ___ \$50 Feline leukemia, feline aids, feline heartworm test
- **Leukemia vaccine** ___ \$32
- **24 Hour Analgesic Injection** ___ \$29 (for 10# or less) Given prior to patient pick up. Provides pets with 24 hours of pain relief at home.
24 Hour Analgesic Injection ___ \$34 (for 10# or more) Given prior to patient pick up. Provides pets with 24 hours of pain relief at home.

Take Home Products:

These products are recommended for the comfort and proper healing of your pet after her surgery. The technician will go over these when you come to pick up your pet.
